

RHINO ENCLOSURES

Universal Self-Locking Storage Enclosure Series

Rhino Series enclosures support remote deployment of network electronics, power supplies and RF components at broadband node locations. They also facilitate the management and storage of fiber optic, coaxial, and copper cables. Flexible and modular in design, Rhino enclosures permit unique, customer-specified features to be included quickly and cost effectively.

Combined with Channell's full line of active and passive electronic equipment enclosures, a complete system can be designed that supports the requirements of broadband telecommunications network operators. Constructed of heavy gauge mill galvanized steel, Rhino enclosures and hardware resist corrosion, protect equipment, and provide security. Multiple power access and electrical options include a commercial power entrance, wiring harness, and surge protection. Mounting pads and vaults are also available.

A pole mount version of the Rhino Series is also available for power supply locations.

Looking for a Fiber Hub? Check out our Optimus Cabinets in our Fiber Optic Division: FiberX.

FEATURES

- **Self-locking cover lenses with multiple security lock options**
- **Coated with Bellcore compliant polyester powder paint**
- **Available with closed-back or open-back chassis frame designs**
- **Top entry cover lens facilitates post wire applications**
- **Closed-back boxes have rear and bottom cable entry knockouts**
- **Adjustable tap mounting plate**
- **Optional demarcation plate kits available with or without F-81 barrel splices installed**
