

# DATA SHEET

# **GOAT FIBER PEDESTALS**

GFP08, GFP10, GFP12

Channells' Goat Fiber Pedestals (GFP) are high-performance fiber distribution pedestals that provide field-proven protection for any outside plant application. The pedestals come in various sizes to provide maximum flexibility in fiber-to-the-home (FTTH) networks.

## **FEATURES**

- Incorporating the Universal Splice Tray, the fiber pedestals provide branch and drop splicing capabilities along with ample cable storage for loose-tube and ribbon fiber optic cables
- Field splicing and drop connections are quick and easy, saving valuable time. The integrated strength members and cable routing guides provide optimal slack storage and cable management
- Goat fiber pedestals are rugged and lightweight thermoplastic enclosures which meet and exceed industry performance standards

# FEATURES AND BENEFITS

Feature	Benefit
Available in 8x8, 10x10 and 12x12 footprints	Capable of being utilized in multiple applications and accommodates various cable sizes and densities
288F single splice capacity max (384F ribbon) [GFP12]	High density splicing in both single-fiber and mass-fusion types
Universal Splice Tray (UST) compatibility for splicing and patching	Capable of mounting up to 4, 6, or 8 Universal Splice Trays for the GFP8, GFP10, and GFP12 respectively
Green Hornet closure and Yellow Jacket terminal compatible (GFP10, GFP12)	Fully encapsulated closure/terminal for maximum protection
Various locking options (including self-lock) available	P-Key, LB Bolt and hex lock patterns provide flexibility while adding security
Integrated cable strain relief	Multiple cable strain and strength member tie downs included to prevent movement
Optional Ground Lug	Separate ground bar kit available for safely grounding armored cable

## **UNIVERSAL SPLICE TRAY**

Available with up to three 6-slot splice chips for single-fiber or ribbon splicing (max splice capacity per tray of 36F single-fiber and 48F ribbon)

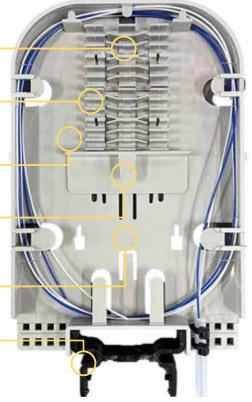

Designed for double stacking a wide range of splice sleeve types and diameters for high-density splicing in one tray. Horizontal placement so no need to cut fibers to length before splicing

Accepts industry standard 40mm and 60mm splice sleeves for 652.D standard fibers and 657.A1 bend insensitive fibers

> Fiber retention clip provides additional buffer tube slack storage while extension arms avoid pinching inside the tray

Clear plastic tray cover ensures that all fiber and splicing is contained within the tray for added peace-of-mind

Splice tray pivot allows 90-degree tilt-rotate for easy access to splice chamber and bonding and grounding safety features
