

G4N SPLICE AND TERMINAL ENCLOSURE

GREEN HORNET®

The Next Generation Green Hornet G4N splice closure is an evolution of platform design consisting of a Mini-Universal Splice Tray and robust environmentally sealed air and water-tight performance with maximum splice density in a subcompact footprint.

The closure can accommodate up to 48F single-fiber splices and is compatible with Channel's Green Hornet line of splitters. The closure height is specifically designed to fit inside a small pedestal or vault to minimize fiber footprint in the field. The G4N accommodates up to 8 drops and is ideal for distributed split and engineered tap deployments.

FEATURES

- High-performance, craft-friendly butt splice fiber closure simplifies splicing and fiber organization
- 48-fiber capacity with high-density splice trays
- Designed for splice, split and patching functions
